

SPEAKMAN®

SE-599

EYESAVER® EYEWASH

DESCRIPTION

The S-599 is a pressurized personal wash station. Perfect protection for workers in locations where portability requirements prohibit the use of a plumbed or gravity-fed eyewash. Offering eight times the flushing capacity of a conventional squeeze bottle, the SE-599 allows a worker who is exposed to hazardous materials in a remote location a better opportunity to reach an ANSI compliant eyewash in a reasonable amount of time. While not a substitute for an ANSI compliant 15-minute eyewash, the SE-599 provides economic first aid in tough to service locations.
